As a Data Scientist on the Facebook Events Discovery team, you are tasked with analyzing user interaction with event recommendations to enhance the relevance of these suggestions....

Question 1: How many times did users click on event recommendations for each event category in March 2024? Show the category name and the total clicks.

```
SELECT e.category_name, count(c.click_id) AS Total_clicks
FROM fct_event_clicks c
LEFT JOIN dim_events e
  ON c.event_id = e.event_id
WHERE click_date BETWEEN '2024-03-01' AND '2024-03-31'
GROUP BY e.category_name;
```

Question 2: For event clicks in March 2024, identify whether each user clicked on an event in their preferred category. Return the user ID, event category, and a label indicating if it was a preferred category ('Yes' or 'No').

```
SELECT
    u.user_id,
    e.category_name AS event_category,
    CASE
        WHEN e.category_name = u.preferred_category THEN 'Yes'
        ELSE 'No'
    END AS preferred_category_click
FROM fct_event_clicks c
JOIN dim_events e
    ON c.event_id = e.event_id
JOIN dim_users u
    ON c.user_id = u.user_id
WHERE click_date BETWEEN '2024-03-01' AND '2024-03-31';
```

Question 3: Generate a report that combines the user ID, their full name (first and last name), and the total clicks for events they interacted with in March 2024. Sort the report by user ID in ascending order.

```
SELECT u.user_id,  
       CONCAT(u.first_name, ' ', u.last_name) as name,  
       COUNT(c.click_id) AS TOTAL_CLICKS  
FROM fct_event_clicks c  
LEFT JOIN dim_users u  
  ON c.user_id = u.user_id  
WHERE click_date BETWEEN '2024-03-01' AND '2024-03-31'  
GROUP BY u.user_id, u.first_name, u.last_name  
order by u.user_id ASC;
```
