

Google

As a Data Analyst on the Google Photos Machine Learning Team, you are tasked with understanding user engagement with our automatic photo categorization features....

Question 1: We need to measure initial user engagement with the categorization features. How many photos have been categorized by the system in January 2024?

```
SELECT COUNT(DISTINCT photo_id) AS categorized_photos
FROM automatic_photo_categorization
WHERE categorization_date BETWEEN '2024-01-01' AND '2024-01-31';
```

Question 3: For March 2024, calculate the total number of categorized photos per user and rename the resulting column to 'total_categorized_photos'. We want to identify the most active users for user research purposes.

```
SELECT user_id, COUNT(DISTINCT photo_id) AS total_categorized_photos
FROM automatic_photo_categorization
WHERE categorization_date BETWEEN '2024-03-01' AND '2024-03-31'
GROUP BY user_id
ORDER BY total_categorized_photos DESC;;
```
