

Meta

As a member of the Marketing Analytics team at Meta, you are tasked with evaluating the performance of branded AR filters....

Question 1: Which AR filters have generated user interactions in July 2024? List the filters by name.

```
SELECT DISTINCT
    f.filter_name
FROM ar_filter_engagements e
JOIN ar_filters f
    ON e.filter_id = f.filter_id
WHERE e.engagement_date >= '2024-07-01'
    AND e.engagement_date < '2024-08-01'
    AND e.interaction_count > 0;
```

Question 2: How many total interactions did each AR filter receive in August 2024? Return only filter names that received over 1000 interactions, and their respective interaction counts.

```
SELECT
    f.filter_name,
    SUM(e.interaction_count) AS total_interactions
FROM ar_filter_engagements e
JOIN ar_filters f
    ON e.filter_id = f.filter_id
WHERE e.engagement_date >= '2024-08-01'
    AND e.engagement_date < '2024-09-01'
GROUP BY f.filter_name
HAVING SUM(e.interaction_count) > 1000
ORDER BY total_interactions DESC;
```

Question 3: What are the top 3 AR filters with the highest number of interactions in September 2024, and how many interactions did each receive?

```
SELECT
    f.filter_name,
    SUM(e.interaction_count) AS total_interactions
FROM ar_filter_engagements e
JOIN ar_filters f
    ON e.filter_id = f.filter_id
WHERE e.engagement_date >= '2024-09-01'
    AND e.engagement_date < '2024-10-01'
GROUP BY f.filter_name
ORDER BY total_interactions DESC
LIMIT 3;
```
