

Stripe

As a Product Analyst on the Billing team, you are tasked with investigating customer retention patterns across different subscription tiers....

Question 1: Identify the first 3 subscription tiers in alphabetical order. Don't forget to remove duplicate values. This query will help us understand what values are in the tier_name column.

```
SELECT DISTINCT tier_name  
FROM fct_subscriptions  
ORDER BY tier_name ASC  
LIMIT 3;
```

As a Product Analyst on the Billing team, you are tasked with investigating customer retention patterns across different subscription tiers....

Question 2: Determine how many customers canceled their subscriptions in August 2024 for tiers labeled "Basic" or "Premium". This query is used to evaluate cancellation trends for these specific subscription levels.

```
SELECT COUNT(DISTINCT customer_id) AS canceled_customers
FROM fct_subscriptions
WHERE end_date >= '2024-08-01'
      AND end_date < '2024-09-01'
      AND tier_name IN ('Basic', 'Premium');
```

Stripe

As a Product Analyst on the Billing team, you are tasked with investigating customer retention patterns across different subscription tiers....

Question 3: Find the subscription tier with the highest number of cancellations during Quarter 3 2024 (July 2024 through September 2024). This query will guide retention strategies by identifying the tier with the most significant dropout case.

```
SELECT tier_name, COUNT(*) AS cancellation_count
FROM fct_subscriptions
WHERE end_date >= '2024-07-01'
      AND end_date < '2024-10-01'
GROUP BY tier_name
ORDER BY cancellation_count DESC
LIMIT 1;
```
