

# Stripe

You are a Product Analyst collaborating with the Stripe Connect team to evaluate the performance of seller payouts within the marketplace ecosystem....

Question 1: What is the total number of payouts made by each seller segment in July 2024?

```
SELECT
    s.seller_segment,
    COUNT(p.payout_id) AS total_payouts
FROM fct_payouts p
JOIN dim_sellers s
    ON p.seller_id = s.seller_id
WHERE p.payout_date >= '2024-07-01'
    AND p.payout_date < '2024-08-01'
GROUP BY s.seller_segment;
```

Question 2: Identify the seller segment with the highest payout success rate in July 2024 by comparing successful and failed payouts.

```
SELECT
    s.seller_segment,
    SUM(CASE
        WHEN LOWER(p.payout_status) = 'successful' THEN 1
        ELSE 0
    END) AS successful_payouts,
    SUM(CASE
        WHEN LOWER(p.payout_status) = 'failed' THEN 1
        ELSE 0
    END) AS failed_payouts,
    COUNT(p.payout_id) AS total_payouts,
    ROUND(
        SUM(CASE
            WHEN LOWER(p.payout_status) = 'successful' THEN 1
            ELSE 0
        END) * 100.0 / COUNT(p.payout_id),
        2
    ) AS success_rate
FROM fct_payouts p
JOIN dim_sellers s
    ON p.seller_id = s.seller_id
WHERE p.payout_date >= '2024-07-01'
    AND p.payout_date < '2024-08-01'
GROUP BY s.seller_segment
ORDER BY success_rate DESC
LIMIT 1;
```

Question 3: What percentage of payouts were successful versus failed for each seller segment in July 2024, and how can this be used to recommend targeted improvements?

```
SELECT
    s.seller_segment,

    SUM(CASE
        WHEN LOWER(p.payout_status) = 'successful' THEN 1
        ELSE 0
    END) AS successful_payouts,

    SUM(CASE
        WHEN LOWER(p.payout_status) = 'failed' THEN 1
        ELSE 0
    END) AS failed_payouts,

    ROUND(
        SUM(CASE
            WHEN LOWER(p.payout_status) = 'successful' THEN 1
            ELSE 0
        END) * 100.0 / COUNT(p.payout_id),
        2
    ) AS successful_percentage,

    ROUND(
        SUM(CASE
            WHEN LOWER(p.payout_status) = 'failed' THEN 1
            ELSE 0
        END) * 100.0 / COUNT(p.payout_id),
        2
    ) AS failed_percentage

FROM fct_payouts p
JOIN dim_sellers s
    ON p.seller_id = s.seller_id

WHERE p.payout_date >= '2024-07-01'
    AND p.payout_date < '2024-08-01'

GROUP BY s.seller_segment
ORDER BY s.seller_segment;
```
