

Netflix

As a Data Analyst on the Netflix Marketing Data Team, you are tasked with analyzing the efficiency of marketing spend in various emerging markets....

Question 1: Retrieve the total marketing spend in each country for Q1 2024 to help inform budget distribution across regions.

```
SELECT
    c.country_name,
    SUM(m.amount_spent) AS total_marketing_spend
FROM fact_marketing_spend m
JOIN dimension_country c
    ON m.country_id = c.country_id
WHERE m.campaign_date >= '2024-01-01'
    AND m.campaign_date < '2024-04-01'
GROUP BY c.country_name
ORDER BY total_marketing_spend DESC;
```

Question 2: List the number of new subscribers acquired in each country (with name) during January 2024, renaming the subscriber count column to 'new_subscribers' for clearer reporting purposes.

```
SELECT
    c.country_name,
    SUM(s.num_new_subscribers) AS new_subscribers
FROM fact_daily_subscriptions s
JOIN dimension_country c
    ON s.country_id = c.country_id
WHERE s.signup_date >= '2024-01-01'
    AND s.signup_date < '2024-02-01'
GROUP BY c.country_name
ORDER BY c.country_name;
```

Question 3: Determine the average marketing spend per new subscriber for each country in Q1 2024 by rounding up to the nearest whole number to evaluate campaign efficiency.

```
SELECT
    c.country_name,
    CEIL(
        SUM(m.amount_spent) / NULLIF(SUM(s.num_new_subscribers), 0)
    ) AS avg_spend_per_new_subscriber
FROM fact_marketing_spend m
JOIN fact_daily_subscriptions s
    ON m.country_id = s.country_id
JOIN dimension_country c
    ON m.country_id = c.country_id
WHERE m.campaign_date >= '2024-01-01'
    AND m.campaign_date < '2024-04-01'
    AND s.signup_date >= '2024-01-01'
    AND s.signup_date < '2024-04-01'
GROUP BY c.country_name;
```
