

Apple

You are a Data Scientist on the Apple Music Personalization Team, tasked with evaluating the effectiveness of recommendation algorithms in engaging users with new music....

Question 1: How many unique users have added at least one recommended track to their playlists in October 2024?

```
SELECT
    COUNT(DISTINCT user_id) AS unique_users
FROM tracks_added
WHERE added_date >= '2024-10-01'
    AND added_date < '2024-11-01'
    AND is_recommended = 1;
```

Question 2: Among the users who added recommended tracks in October 2024, what is the average number of recommended tracks added to their playlists? Please round this to 1 decimal place for better readability.

```
SELECT
    ROUND(AVG(track_count), 1) AS avg_recommended_tracks
FROM (
    SELECT
        user_id,
        COUNT(*) AS track_count
    FROM tracks_added
    WHERE added_date >= '2024-10-01'
        AND added_date < '2024-11-01'
        AND is_recommended = 1
    GROUP BY user_id
) AS user_tracks;
```

Question 3: Can you give us the name(s) of users who added a non-recommended track to their playlist on October 2nd, 2024?

```
SELECT DISTINCT
    u.user_name
FROM tracks_added t
JOIN users u
    ON t.user_id = u.user_id
WHERE t.added_date >= '2024-10-02'
    AND t.added_date < '2024-10-03'
    AND t.is_recommended = 0;
```
